

On-page SEO audit

Prepared for On-Page.ai API

<https://api.on-page.ai/best-seo-api>

Keyword: "best seo api" | Region: US

ON-PAGE SCORE 85/100

10 comparison pages inform the coverage analysis.

The comparison page has strong on-page coverage. The next useful improvement is to help readers evaluate providers through practical testing, clarify AI Mode support, and add original comparison evidence.

Recommended next steps

01 Give readers a practical testing method

[Content editor](#) | [Editorial update](#)

Expand the reliability section with a repeatable provider test: use the same URLs and keywords, then record successful responses, failed requests, completion time, and cost per finished workflow.

02 Clarify which providers support AI Mode

[Product researcher](#) | [Documentation review](#)

Explain how AI Mode data differs from conventional search results. Check each provider's documentation before adding capability claims to the comparison.

03 Add evidence from your own comparison

[Technical reviewer](#) | [Original research](#)

Use the provider test to publish a small original results table. Describe the inputs and method so readers can judge what the measurements establish.

Why these actions

Recommendations combine scan evidence with an editorial review of this page.

01 Give readers a practical testing method

"testing" is missing from this page and appears on 7 of 10 compared pages.

Check: A reader can reproduce the comparison. Any published measurements come from completed tests.

02 Clarify which providers support AI Mode

"ai mode" is missing from this page and appears on 7 of 10 compared pages.

Check: Every capability claim has a supporting source; unverified support stays unconfirmed.

03 Add evidence from your own comparison

The information-gain analysis detected 0 unique numeric data points on this page; the comparison-page average is 11.1. Review the page before planning new research.

Check: Results can be traced to the test records. No values are estimated to fill the table.

Read the scores in context

On-page: 85/100. Originality: 42/100. These are separate report measures; they are not percentages of SEO work completed or ranking forecasts.

Scope and next check

This report covers one URL, keyword, and region. It is a content and relevance review, not a site-wide technical or backlink audit. Priorities, owners, and actions were selected by the reviewer.

After publishing the agreed edits, scan the same URL and keyword again. Check whether the topics are now covered. Measure search traffic separately in your analytics.
